

JINKA HARSHAVARDHAN

Chennai, Tamil Nadu, India

+91 7569421769 jinkaharsha000@gmail.com [LinkedIn](#) [GitHub](#)

Summary

Dynamic Gen AI Engineer with a strong foundation in computer vision and LLM workflows. Proven expertise in PyTorch and prompt engineering, complemented by a passion for innovative solutions. Adept at collaborating in fast-paced environments, I thrive on transforming complex challenges into impactful results.

Experience

Gen AI Engineer Dec 2025 – Present

Immerso.ai, Chennai

- Engineered generative AI solutions in R&D department at Immerso.ai.
- Developed expertise in computer vision, LLM workflows, PyTorch, and generative AI through research and development projects.

Web Developer Intern Oct 2024 – Dec 2024

Mainflow

- Acquired web development skills during internship, contributing to team projects.
- Improved front-end design by implementing responsive layouts using React and Tailwind CSS, enhancing user experience.

Skills

Programming Languages	Python, SQL, JavaScript
AI/ML	Machine Learning, Deep Learning, NLP, Computer Vision, Generative AI, Agentic AI
Frameworks & Libraries	PyTorch, Scikit-learn, LangChain, LangSmith, LangGraph, Streamlit, NumPy, Pandas, FastAPI
LLM Technologies	Prompt Engineering, LLM Workflows, Multimodal AI, RAG Concepts, Ollama, Qwen3, ReAct
APIs & Tools	FastMCP, GitHub API, Plane API, Git, GitHub, Pytest, VS Code, Linux, Virtual Machines
Web Technologies	HTML, CSS, JavaScript, React.js, Tailwind CSS

Projects

AI Sprint Copilot (LLM - Agentic AI)

- Built a multi-agent AI sprint intelligence platform using LangGraph, LangChain, FastMCP, GitHub, Plane, and local Qwen LLMs for automated project analytics and developer insights.

Hybrid Physics-Guided Spatial Earthquake Forecasting (HPSF-Net)

- HPSF-Net is a hybrid deep learning framework that combines seismic waveforms, earthquake history, and spatial region interactions with physics-guided constraints to perform short-term probabilistic earthquake forecasting.

Multilingual Sentiment Analysis

- Web application for analyzing reviews developed using Python and Streamlit.

AI-Driven Drowsiness Detection System

- A drowsiness detection system uses deep learning to analyze eye movement and facial expressions to detect fatigue and generate safety alerts.

Education

B.Tech Artificial Intelligence

May 2026

SRM Institute of Science and Technology, Chennai

CGPA: 9.16 / 10

Certifications

- Introduction to Modern AI – Cisco
- Introduction to Generative AI – Coursera
- Database Management – Coursera
- Introduction to Machine Learning – Kaggle
- Introduction to Deep Learning – Kaggle
- Computer Organization and Architecture – Udemy

Achievements & Activities

- Finalist at **ReGenHack'25** conducted by IE(I) Students Chapter.
- Worked as Campus Executive at Skillvertex and coordinated student engagement activities.

Languages

English, Hindi, Telugu
